

ABSTRACT

The present invention relates to a warp knit having excellent touch and a process of preparing such a warp knit.

The present invention provides a warp knit consist of a front surface
5 layer and a rear surface layer, the front surface layer consisting of ultra
fine yarn with mono-filament denier of 0.01~0.9 denier, the rear surface
layer consisting of synthetic yarn or high shrinkage yarn with
mono-filament denier of 1~5 denier, wherein the recovery rate of
elongation in the directions of wale and course is 8~30 %. The warp knit
10 according to the present invention is used to manufacture artificial leathers
or ladies' clothes.
